Eco Floral Tributes

When it comes to choosing farewell flowers for your loved one, sustainability and low environmental impact might be as important as the design and colour.

With this in mind we have created a range of fully sustainable designs which are made with no plastics and avoid traditional florist foam. These tributes are fully compostable and where possible feature local flowers and foliage that are grown without the use of heated greenhouses and chemicals.

All the designs in this book can be personalised by colour and favourite or special flowers* can be incorporated so that the tributes you choose will be as unique as your loved one.

We can also include our unique range of wooden letter, words and symbols to reflect their personality, interests or hobbies.

* some flowers may not be available at certain times of the year
